

If the Government Won't, the People Will.....

STOP CRUDE OIL BY RAIL SHIPMENTS TO RICHMOND!

Stop pollution of our communities and our climate!

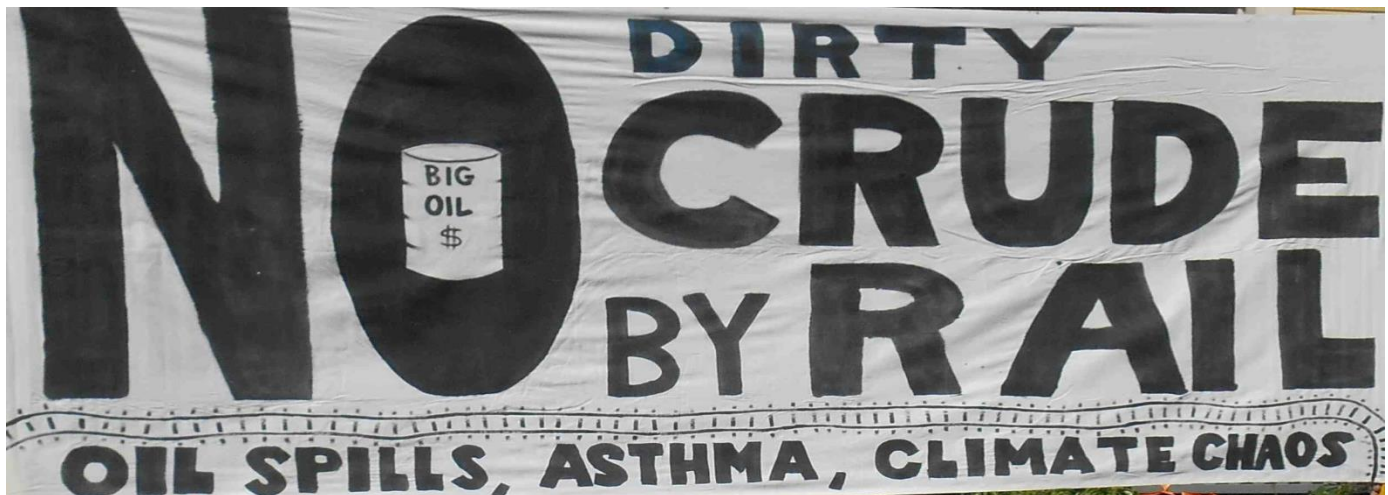

SATURDAY, MAY 31, 2014 AT 1 PM

**PROTEST AT KINDER MORGAN'S RAIL YARD
520 CASTRO STREET, RICHMOND, CA**

SHUTTLES WILL PROVIDE RIDES FROM RICHMOND BART -- 12:15-12:30 pm

Meet at Castro St. entrance to Kinder Morgan train yard between entrance to Chevron Refinery/Hwy 580 & Hensley Street, close to Hensley across Castro Street from General Chemical's entrance at 525 Castro Street.

(Closet parking is up Hensley Street)

The Bay Area Air Quality Management District issued a permit to Kinder Morgan to operate its crude-by-rail project to import highly explosive and toxic crude oil into Richmond, a low income community of color already burdened by pollution caused by the fossil fuel industry. BAAQMD issued the permit without public notice or opportunities for public comment. The number of trains carrying crude oil has risen dramatically due to increased drilling in both the Alberta tar sands in Canada and the Bakken shale oil area of North Dakota, and the number of serious accidents has also increased.

We the people must raise our voices and send a loud and clear message that more pollution from dirty crude oil and tar sands is not acceptable in the bay area or anywhere else. **KEEP THE OIL IN THE GROUND!!**
