The Struggle In Turkey And The Fight To Defend Human Rights And Labor

Reports from Labor, Kurds, Armenians, Turks and Journalists

Sunday October 18, 2015
7:00 PM 518 Valencia

The Turkish Erdogan government, Turkish state, its police and military have launched attacks on the Kurdish people, progressives, all opposition and other minorities throughout the country.

At the same time the Erdogan government continues privatization and attacks on working people and the unions in Turkey from airline workers to Artigas workers, Metal Workers and Istanbul Hyatt and Dora Workers.

The struggle against the growing repression and assassinations of people throughout the country is moving the country toward civil war.

This forum will have speakers from the Turkish community, Kurdish community, Armenian community and reports on the growing repression of labor and journalists who are being kidnapped and terrorized.

The forum will also look at the United States role in breaking up Iraq, Libya and Syria which has created massive flows of refugees and growing threats to the lives of millions.
